Subject: T25 South Habitat Restoration Documents for EPA Review
Attachments: QAPP_Addendum_2_Inwater_Draft_01-25-2021.pdf; T25S_DataReport_DRAFT_01-25-2021_NoAppendices.pdf

Ravi and Erika,

Attached are two documents for EPA's review on the East Waterway T25 South habitat restoration project. The first file is the Data Report that summarizes investigations the Port conducted in 2019 and 2020. The 2019 work was conducted per the original QAPP addendum that EPA reviewed (recall we coordinated on the archive triggers), and supplemental upland borings were conducted in 2020. The second file is a QAPP Addendum for additional sediment coring to characterize the vertical extent of contamination within the area that would be dredged as part of the habitat project. The Port's goal with that dredging would be to complete the necessary CERCLA cleanup in the eastern half of the channel by the T25 restoration project.

The full Data Report is too big to email, but has been posted on our sharepoint site here:

We would like to schedule a call with you to describe the status of the T25 South restoration project and discuss the process for working with EPA on this important project. Please let us know what would work for you.

Thanks

Dan
